

Department of Mathematics
Petition for Exemption to Sequence Requirement

As one of the criteria for advancement from the pre-Ph.D. program to the Ph.D. program, a student is required to complete at least one full-year sequence of courses from each of the following three areas: analysis/probability, topology/geometry, and algebra. In order to count toward this requirement, each sequence must be completed with a minimum grade of B or better and an average grade of B+ or better. At least two of the three sequences must be at the 600 level. More details can be found in the graduate handbook.

This form may be used to grant an exemption to one of these sequence requirements.

Sequence (circle one):	analysis	topology/geometry	algebra
Level (circle one):	500	600	

Student

Name: _____

Pre-Ph.D. Advisor

Name: _____ Signature: _____ Date: _____

Ph.D. Committee Chair
